WEIGHT IS PERSONALLY UNIQUE

At Thinner Band Hypnosis, our imaginary gastric band surgery programs your mind to feel fuller, faster. As a result, you'll find yourself feeling satisfied with smaller portions while losing weight effortlessly – no dieting or exercise required.

Our program is personally unique as each client has unique and individual needs, causes, reasons and triggers for improper eating habits. Each session is specifically designed to address all the personal issues and challenges that our clients are struggling with, such as desires for sweet and salty foods and overeating as a result of past happenings, or present stressful issues, anxiety or boredom.

All of this is accomplished by fighting fire with fire through our strong understanding and experience with addictions of all kinds. We attack all food addictive thinking with 'triggers' to combat the 'triggers' that cause your cravings, urges, needs and desires.

TESTIMONIALS

"If I had to describe your thinner band hypnosis therapy in one word it would be WOW! Unlike other diets I am not hungry after meals and my cravings and desires for all the wrong foods have disappeared completely. I've lost 32 pounds so far in just 2 short months and I am determined to keep going until I reach my desirable weight."

– Allen Wapinski, age 41

"Dr. De Marco has helped me lose 20 pounds. After just a few powerful sessions of hypnosis. Without the positive reinforcement of hypnosis I feel that I would have just been bouncing from diet to diet instead of making good steady progress."

– Sheree Puccio, age 45

"I haven't touched fried or fatty foods since starting the program and I feel my energy starting to come back. I'm already seeing changes in the way my clothes are fitting and my son commented that I'm looking slimmer! Thank you Dr. Tony!"

– Sereta Johnson, age 29
